

3. Display the Details of Jobs in Descending Order of Job Title

To sort and display job details in descending order of job title using Pandas.

Procedure

1. Import the Pandas library.
2. Read the jobs.csv file.
3. Sort the data by the job_title column in descending order.
4. Display the sorted data.

Program and output:

```
ex 3.py - C:\Users\sindh\OneDrive\Desktop\Query\Experiments\ex 3.py (3.14.0)
File Edit Format Run Options Window Help

import pandas as pd
df = pd.read_csv("jobs.csv")
print(df.sort_values(by="Job_Title", ascending=False))

IDLE Shell 3.14.0
File Edit Shell Debug Options Window Help
Python 3.14.0 (tags/v3.14.0:ebf955d, Oct 7 2025, 10:15:03) [MSC v.1944 64 bit (AMD64)]
on win32

```

Result

Thus, the job details were displayed in descending order of job title successfully.

4. Create a Line Plot of Alphabet Inc. Stock Prices

Aim

To create a line plot of the historical stock prices of Alphabet Inc. between two specific dates.

Procedure

1. Import Pandas and Matplotlib.
2. Read the stock dataset.
3. Convert the Date column to datetime format.
4. Filter records between the required dates.
5. Plot the closing stock prices as a line graph.

Program and output:

Result

Thus, the line plot of Alphabet Inc. stock prices was created successfully.
